Background / Introduction

Briefly introduce the clinical context and relevance of the case. State why this case is important, rare, unusual, or contributes to the existing knowledge.

Objective / Purpose

A clear statement of the study aim(s) or research question(s).

Methods

Description of the study design, methodology, materials, analytical approach, and type of data used.

Results

Describe the patient's demographics, clinical history, symptoms, diagnostic findings (lab/imaging), and treatment course. Focus on key clinical decision points. Ensure patient confidentiality is maintained.

Conclusion

Summarize the main takeaway message from the case. Highlight any clinical implications or recommendations for practice.

Keywords: *Provide 3–5 keywords relevant to the case*
